

Editing CMS 1500 Claims

Requirements:

Windows based computer/laptop, internet access

Purpose:

MediMatrix can create a print image that can be used to create CMS 1500 (HCFA 1500) paper claims. Periodically, due to payer non-compliance, the claims for a payer may need to be modified.

Steps:

Our recommended solution is for providers to download and install Foxit PDF Editor at the following URL:

- http://www.foxitsoftware.com/PDF_Editor/

-Editor will allow you to edit claims per payer specifications prior to printing
